## Get started guide

Welcome to Mailgun! Let's get some of the basics set up.

Guide completion

1 / 5

 **Activate your account**
 Invite a teammate

Skipped

 **Send a test email**

5 mins

 Set up a custom domain

10 mins

 Send a production email

1 min

 **API key has been created**
 **Copy and run the code in your IDE**
 This API key is displayed only once, so make a copy and keep your key somewhere safe. If you lose this key, you can delete it and generate a new one.

API Key **d3c5254779c26c47ecc608e1b7c3dd31-5a4acb93-892863c3**

Sandbox domain **sandbox3241021048d5454c95c67d6c23d5616d.mailgun.org**

Base URL **https://api.mailgun.net**
